

Axxiome Banking: Anti-Money Laundering (AML), Fraud Detection and Credit Bureau Integration

Axxiome Banking is a comprehensive, ready to run, platform for consumer and business retail banking underpinned by proven state-of-the-art technology. The platform incorporates interfaces to credit bureaus to comply with Know Your Customer regulations including: Anti-Money Laundering and Fraud capabilities.

OVERVIEW

Regulatory enforcements are always changing, and demand a high understanding of a financial institution's customers and prospects.

Integration with credit bureaus can be costly and difficult depending on an organization's existing architecture. When integrating with the credit bureaus there are many things to consider, such as where decisions are made and how these may be adapted to individual banks' needs.

Axxiome Banking offers an out-of-the-box integration to credit bureaus and comes pre-integrated with credit bureaus for address and identity validations, anti-money laundering and fraud detections, and credit and affordability checks.

These interfaces are fully integrated with the Axxiome Digital Decision Engine to determine customer eligibility criteria and product offerings.

GENERAL FACTS & FEATURES

Out-of-the-Box*:

- Address validation capabilities
- AML/Fraud validations, checking customer data against black lists
- Credit and affordability checks (credit scores, etc.)
- Decision Rule Engine to define desirable/undesirable customers based on AML/Fraud results
- Automatic product offering based on credit and affordability scores
- All of the above are integrated to Axxiome Banking's core and front end channels.

BUSINESS VALUE

- Highly flexible and configurable decision engine
- Comprehensive sales products functionality that defines automatic product offerings based on credit scores, which enables customer segmentation management in the simplest way
- Know Your Customer (KYC) compliance with minimal effort
