

Advanced Banking Academy: Provide all project stakeholders the necessary business and solution insights

The Advanced Banking Academy prepares your complete project team for the challenges of a Core Banking transformation with SAP Technology. The modular approach spans from Banking Industry Knowledge, Reference Processes and Methodology, as well as Application and Technology specific components.

OVERVIEW

Major change initiatives in the banking industry (such as Core Banking transformations) often face the challenge to find a heterogeneous project team to work. Individuals from different professional backgrounds and different bank departments are included in transformation teams being confronted with new applications and solutions.

Technology experts from both the financial institution as well as their providers need to get familiar with complex banking and solution specific processes and terminologies in a very short period of time.

Very often the training offerings end at the boundaries of the specific applications and do not provide an E2E view.

The Advanced Banking Academy is designed to overcome this common pitfall. It is a holistic suite of coaching and guidance modules addressed to all different types of contributors in a banking transformation program.

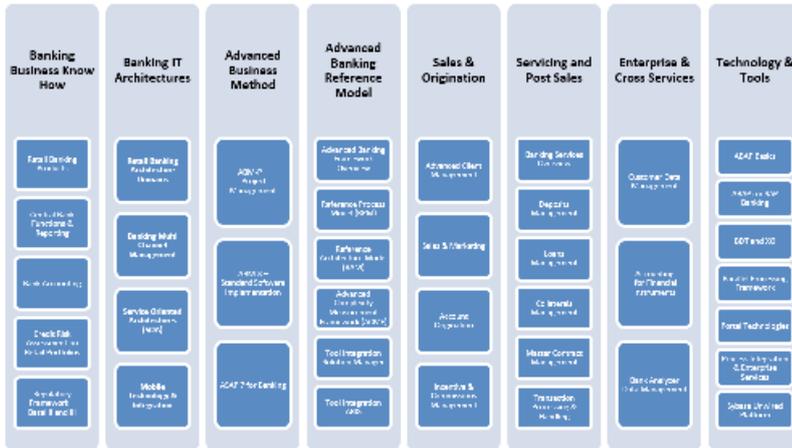

The Banking Industry Knowledge and Banking IT Architecture modules, as well as the ones concentrating on Transformation Methods and the Banking Reference Processes are designed in a generic way.

The Sales & Origination, Servicing & Post Sales, as well as Enterprise & Cross Services modules are very much tailored towards the applications offered or certified by SAP AG in those areas.

The technology stack is focused on the framework and tools provided within a SAP based environment.

ADVANCED BANKING ACADEMY

ADVANCED BANKING ACADEMY

The roadmap of a full Advanced Banking Academy covers a total of 8 major training areas with over 35 detailed modules.

During the composition process for a given transformation initiative, the individual compendium of modules will be defined and participants selected. The typical duration of an ABA is 5-8 weeks with alternating audience.

Apart from the general sessions focused on Banking Industry & Architecture knowledge and Transformation Methods and Reference Processes, Axxiome offers 'out of the box' workshops, which cover the standard functionality of SAPs offering for the banking industry. If required, we will set up a customized Academy to focus on your specific needs.

In all modules standard training material is combined with hands on exercises and use cases from other programs.

You can choose between all levels of knowledge. Beginning with high level overviews for project managers and team leaders, down to deep dive sessions into technical areas. We provide it all out of one single source.

BUSINESS VALUE

With Axxiome's Advanced Banking Academy you will enjoy the advantages of a holistic and integrated workshop compendium that allow you to address all knowledge distribution requirements of a transformation program. Common approaches in the market only partially cover those needs.

- Get your decision makers familiar with the concepts and technology of the underlying solutions of your transformation journey
- Your project team will acquire deep knowledge on the functionality and configuration capabilities of the solution.
- Business experts will understand the possibilities and boundaries for process and solution design
- Technical experts will be familiar with central concepts of Banking Reference Process Models and Banking Knowledge and solution specific terms.
- Test teams will be trained for an efficient execution of Integration and User Acceptance Tests
- End users who understand the functionality and use concepts of the solution.

ABOUT AXXIOME

Axxiome is a global solutions provider for the financial services industry with operations in Europe, North America, Latin American, and Asia Pacific. Axxiome excels in linking legacy banking platforms with modern solutions and is considered a leader in banking and insurance transformation projects across the globe. AXXIOME EXPERTISE

As a specialized solution and service provider with a proven global expertise in Banking Transformation, Axxiome can offer these transformation academies with full ownership of knowledge. All instructors have many years of project experience and will always enrich the academies with real life experience.

All modules focus on the issues and difficulties that have been faced and solved in previous programs.

This helps to quickly transmit the necessary starting knowledge and prepare your transformation team perfectly with the 'starter knowledge pack' for the work on the project afterwards.
