

## Hybrid Cloud Services: Rapid delivery of banking solution environments to facilitate testing, innovation and evaluation

**Hybrid Cloud Services combines Axxiome's expertise in core banking, channels, and banking architecture solutions offered by SAP, with the flexible and agile world of cloud infrastructure provisioning.**

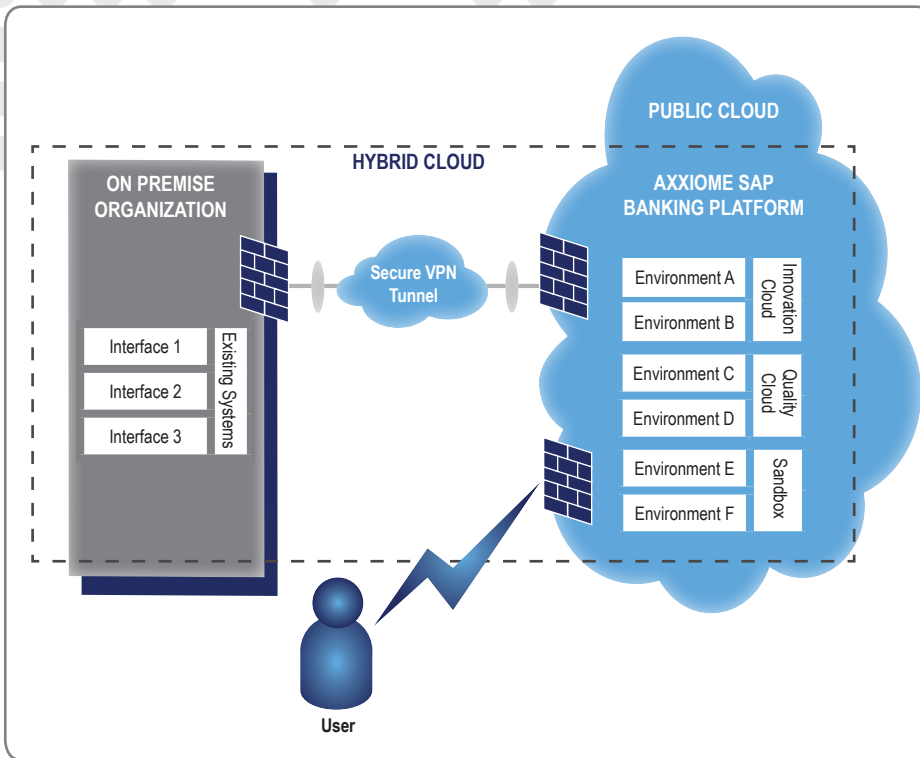

### OVERVIEW

- **Functionality:** This is a turnkey service where banking systems can be created very quickly for usage, evaluation or testing.
- Axxiome configures the environments based on the organization's needs and business scenario. These can be vanilla installations or copies from the organization's environments. Entire landscapes of systems can be replicated in the cloud and used to validate integration scenarios.
- These landscapes can form "Innovation clouds" or "QA Clouds", or used to create sandbox environments to feature enablement or show business value from new releases.
- Utilizing these agile turnkey environments helps the financial services organization avoid complexity sprawl and they can then be archived or removed once their useful life has elapsed.
- The Axxiome cloud environment is a hybrid cloud solution which means that on premise systems are connected to the cloud environment using secure industry-leading network devices and software. This connects the world of cloud to the ground in the data center in a secure and manageable way.

### GENERAL FACTS

- As experts in core banking solutions, cloud based banking systems architecture and SAP Financial Services solutions, Axxiome is in a unique position to offer this dynamic platform.
- Axxiome can quickly create or clone environments and provide access for the organization with an agile, subscription based model – reducing capital costs and the need for specialized expertise on site.
- Axxiome provides the setup, configuration, maintenance and operations for the platform in a "turnkey" subscription based model. The single monthly subscription fee includes architecture, security management, SAP Basis, SAP ABAP development, functional consulting, cloud infrastructure expertise, and operating system maintenance based on an agreed Service Level Agreement.

## AXXIOME HYBRID CLOUD

## AXXIOME EXPERTISE

Axxiome provides senior level expertise combining both business and technological industry perspectives.

Axxiome brings deep and broad SAP expertise to all engagements to ensure that organizational goals and business objectives are aligned.

## BUSINESS VALUE

- The Axxiome Hybrid Cloud Service helps the organization make well-informed business decisions about the banking landscape in a rapid, agile and simple fashion.
- This service also helps the organization avoid steep infrastructure investment and operational costs and complexity associated with increased environments.

## ABOUT AXXIOME

Axxiome is a global solutions provider for the financial services industry with operations in Europe, North America, Latin American, and Asia Pacific. Axxiome excels in linking legacy banking platforms with modern solutions and is considered a leader in banking and insurance transformation projects across the globe.
